Riley Example — SYNTHETIC CV
QUALITY ASSURANCE ASSISTANT

Synthetic profile · Fictional candidate · Marseille, France

SUMMARY

Junior QA practitioner focused on careful test notes, accessible bug reports, and practical collaboration with product and engineering teams.

EXPERIENCE

Fictional Harbor Apps — QA Assistant 2031–2033

- Maintained a Python utility that compared anonymized sample exports and identified unexpected changes.
- Planned exploratory sessions for account and reporting features; recorded expected results, observed behavior, and browser details.
- Created and updated regression scenarios after fixes, then discussed release risks with the engineering lead.
- Used Git branches and pull-request review to update test data and shared documentation.

Community Repair Lab — Digital Projects Intern 2030–2031

- Helped document inventory workflows and checked data-entry forms with volunteers.

PROJECT

Designed a sample test strategy for a room-booking app, covering validation, keyboard navigation, and time-zone boundaries.

EDUCATION

Diploma in Software Testing, fictional Coastline Technical School, 2030.

TOOLS

Python, Git, issue tracking, browser dev tools, spreadsheets, basic SQL.
