Morgan Example — SYNTHETIC CV
SOFTWARE SUPPORT ANALYST

Synthetic profile · Fictional candidate · Lyon, France

PROFILE

Early-career analyst with experience supporting internal software users, maintaining clear incident notes, and checking small data-processing changes before release.

EXPERIENCE

Northstar Cooperative — Junior Support Analyst 2030–2032

- Used Python scripts to validate weekly CSV imports and summarize rejected rows for the data team.
- Reproduced reported defects, documented steps to reproduce, and kept a regression test checklist for monthly releases.
- Worked with a teammate to review changes in Git and wrote concise commit messages for support fixes.

Open Workshop — Technology Volunteer 2029–2030

- Prepared short how-to guides and helped new members use shared laptops and open-source tools.

SELECTED PROJECT

CSV quality checker: built a small Python command-line utility to flag missing fields, duplicate rows, and unexpected date formats; added sample inputs and a README.

EDUCATION AND LEARNING

Applied Computing Certificate, fictional Rhône Learning Institute, 2029.

LANGUAGES

French (fluent), English (professional), Arabic (conversational).
