Jordan Example — SYNTHETIC CV
SOFTWARE OPERATIONS INTERN

Synthetic profile · Fictional candidate · Rotterdam, Netherlands

SUMMARY

Early-career operations contributor with a foundation in scripting, careful change review, and collaborative incident follow-up.

EXPERIENCE

Example Cloud Workshop — Operations Intern 2030–2032

- Built Python scripts for checking sample service logs and preparing weekly CSV summaries.
- Followed documented test strategies for configuration updates and added regression checks for known edge cases.
- Used Git to track changes to runbooks, sample scripts, and test fixtures.
- Shared concise incident timelines and asked a reviewer to approve operational changes.

PROJECT

Local monitoring exercise with fictional services; documented warning thresholds, test inputs, and recovery steps.

EDUCATION AND DEVELOPMENT

Applied IT diploma, fictional Delta Technical Institute, 2029. Introductory coursework in networks and secure operations.

LANGUAGES

Dutch, English, French (intermediate).
