Adam Exemple — SYNTHETIC CV
JUNIOR PRODUCT QA

Synthetic profile · Fictional candidate · Montréal, Canada

PROFILE

Multilingual software-testing trainee who enjoys turning user reports into clear examples, test notes, and small repeatable tools.

EXPERIENCE

Fictional North Shore Studio — Product QA Intern 2031–2033

- Used Python to inspect anonymized CSV fixtures and summarize malformed records for the product team.
- Explained a test strategy for a multilingual booking flow, including keyboard navigation and date formatting.
- Maintained regression scenarios in Git and reviewed code and test-data changes with a mentor.
- Wrote release notes in French and English and helped triage reported issues.

PROJECT

Created an example bug-report template that records steps, expected behavior, observed behavior, and accessibility context.

FORMATION / EDUCATION

Programme de développement logiciel, fictional Montréal Tech Cooperative, 2030.

LANGUAGES

French (fluent), English (fluent), Arabic (basic).
